## PROFESSIONAL SUMMARY

Motivated Software Engineering student with hands-on experience in full-stack development, AI-powered applications, and cloud deployment. Skilled in Java, Spring Boot, React, SQL, Docker, and GCP basics, with interest in backend systems and modern software development. Passionate about learning new technologies, building real-world projects, and solving practical problems through software.

## EDUCATION

|                                                                                                                      |             |
|----------------------------------------------------------------------------------------------------------------------|-------------|
| <b>Bachelor of Technology — Computer Science Engineering</b><br>Parul University, Vadodara, Gujarat   CGPA: 6.97/ 10 | 2023 – 2027 |
| Intermediate (MPC) — Narayana Junior College, Kakinada, AP<br>826/1000   Grade A                                     | Mar 2023    |
| SSC — Narayana EM School, Kakinada, AP<br>557/600   92.83%                                                           | Jun 2021    |

## TECHNICAL SKILLS

**Languages:** Java, Python, JavaScript, SQL, HTML/CSS  
**Frameworks & Libraries:** Spring Boot, React.js, Node.js, Express.js  
**Databases:** PostgreSQL, MySQL, MongoDB  
**AI & Tools:** Groq API, Scikit-learn, Machine Learning, RESTful APIs, WebSocket, Docker, GitHub Actions  
**Cloud & DevOps:** Vercel, Render, GCP (Cloud Run), GitHub Actions, Cloud Deployment  
**Tools & Methodology:** Git, Version Control, IntelliJ IDEA, Postman  
**Mathematics:** Linear Algebra, Probability & Statistics, Discrete Mathematics, Calculus, DSA  
**Languages (Human):** English, Hindi, Telugu

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------|
| <b>CivilianShield — AI-Powered Civilian Safety Platform</b><br><i>Spring Boot · REST API · H2 · WebSocket · React</i> <ul style="list-style-type: none"><li>Ideated, architected, and shipped a full-stack civilian safety platform from scratch; live in production with 5+ REST API endpoints serving real users</li><li>Built SOS alert system, incident mapping, and emergency contact module — iterated across 3 major versions to reach final stable release</li><li>Integrated an AI-based threat detection pipeline to automate emergency alert handling and improve response efficiency.</li></ul> | <a href="#">Live Demo</a>   <a href="#">GitHub</a> |
| <b>Skill Gap Analyzer — AI Career Intelligence Tool</b><br><i>React · Node.js · Vercel</i> <ul style="list-style-type: none"><li>Conceptualized, built, and launched an AI-powered career tool end-to-end; analyzes resumes against job descriptions and outputs a prioritized skill gap report in under 3 seconds</li><li>Leveraged Groq LLM for rapid inference; streamlined resume and job description analysis using AI-powered insights</li></ul>                                                                                                                                                      | <a href="#">Live Demo</a>   <a href="#">GitHub</a> |
| <b>CS AI Agent — Intelligent Customer Support Chatbot</b><br><i>Groq API · React · Vercel Serverless</i> <ul style="list-style-type: none"><li>Engineered a production-grade AI agent with context memory and custom personas; went from concept to live product in under 2 weeks</li><li>Solved CORS and serverless deployment challenges independently; maintains active user sessions with sub-2-second response times</li></ul>                                                                                                                                                                         | <a href="#">Live Demo</a>   <a href="#">GitHub</a> |
| <b>Context-Enhanced Messaging Platform — AI Chat Summarizer</b><br><i>Spring Boot · React · PostgreSQL · Docker · Render</i> <ul style="list-style-type: none"><li>Built a full-stack messaging application with AI-powered conversation summarization; containerized with Docker and deployed to cloud with zero-downtime setup</li><li>Developed a scalable REST API with 10+ endpoints; implemented real-time messaging via Spring WebSocket handling concurrent connections</li></ul>                                                                                                                   | <a href="#">Live Demo</a>   <a href="#">GitHub</a> |

## WORK EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| <b>Full Stack Developer (Freelance)   Self-Employed   Remote</b><br><i>Jan 2026 – Present</i> <ul style="list-style-type: none"><li>Built and deployed 4+ full-stack web applications using Spring Boot, React, PostgreSQL, and Docker on Render and Vercel platforms.</li><li>Integrated RESTful APIs, WebSocket channels, third-party services into Spring Boot microservices with CI/CD pipelines; cut deployment time by 50%</li><li>Developed an AI-powered chat application using Groq API and real-time WebSocket communication, containerized with Docker for cloud deployment.</li></ul> |  |
| <b>Open Source Developer   GitHub   Remote</b><br><i>2025 – Present</i> <ul style="list-style-type: none"><li>Maintained 5+ public repositories with clean code structure, comprehensive documentation, and Git version control best practices; accumulated 100+ commits across projects</li><li>Built and published an AI-powered CS tutor chatbot using Groq API (Llama model) with Vercel serverless backend; handles 50+ concurrent sessions with secure API key management</li></ul>                                                                                                         |  |

## CERTIFICATIONS & TRAINING

- HackerRank — Java (Basic) Certified
- HackerRank — SQL (Basic) Certified
- JPMorgan Chase — Advanced Software Engineering Job Simulation | Forage (Jan 2025)
- Deloitte — Data Analytics Job Simulation | Forage (Dec 2024)
- NPTEL — Computer Networks And Internet Protocol (IIT Kharagpur, 2025)
- Infosys Springboard — Programming Fundamentals using Pvthon - Part 1 (2026)
- Kaggle · Intro to Machine Learning (Jun 2026)
